Shahzaib Ajmal Subhani

Full Stack Web Developer | **PHP | Laravel | React | Node.js**

+971 55 410 3529 | shahzaibsubhani28@gmail.com | GitHub | LinkedIn | Portfolio | Dubai, UAE

PROFESSIONAL SUMMARY

Full Stack Developer with **4+ years** of experience designing and shipping scalable web systems across energy, logistics, and ERP — primarily in Laravel and React. At Zap Electric (Dubai), I'm the sole developer behind a platform serving **2,000+** active users, **85+ REST APIs**, and Stripe-powered subscription billing. I own the full development lifecycle — from schema design and backend architecture to cloud deployment. Known for solving critical production issues quickly, working independently, and communicating effectively with non-technical stakeholders. Previously built a **9+ module** housing society platform at Optimum Tech handling **100k–150k** gate pass transactions monthly.

TECHNICAL SKILLS

Programming Languages: PHP, JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Frameworks & Libraries: Laravel, React.js, Node.js, Next.js, Vue.js, Express.js, Inertia.js

UI & Styling: Tailwind CSS, Bootstrap 5, Material UI

Backend & Database: MySQL, MongoDB, RESTful API Development, WebSocket, Redis / Caching, Query optimization

Integrations & Services: Stripe, Google Maps API, Firebase, SMTP/API Email

Cloud & Deployment: AWS (EC2, S3, RDS, Lambda, CloudFront), Docker, GitHub Actions (CI/CD), Hostinger

Tools & DevOps: Git/GitHub, Postman, Composer, NPM, Agile/Scrum

PROFESSIONAL EXPERIENCE

Full Stack Developer — *Sep 2023 – Present*

Zap Electric FZCO — Dubai, UAE

- Chose the architecture and tech stack from scratch — selected Laravel + Blade for the admin dashboard and designed the entire platform to support **6+ role-based** access levels across orders, subscriptions, routes, deliveries, and inventory.
- Built the **backend infrastructure** and **web-based admin dashboard** entirely solo, along with **85+ RESTful API** endpoints for the customer website and mobile app — with the platform live on Hostinger and handling **2,000+** concurrent users in testing.
- Integrated Stripe for subscription billing and Google Maps API for real-time driver route tracking — managed the full integration lifecycle from sandbox to live testing environment.

Full Stack Developer — *Aug 2022 – Jun 2023*

Optimum Tech — Pakistan

- Independently built and maintained **4–5 large-scale SaaS ERP** systems including a marriage hall booking platform and car carrier management system — working solo on most projects within an Agile environment with full ownership from requirements to deployment.
- Inherited a large, partially-built housing society platform — refactored the entire codebase, led the **Laravel 6 to Laravel 9 migration**, and brought all **9+ modules** to a stable production state.
- Maintained a **two-environment** deployment workflow throughout the project — all changes validated on a dedicated testing server before being released to the live production server, followed consistently across every update.
- Proactively identified and resolved performance bottlenecks through query analysis and profiling — reduced page load time by **30%** across the housing platform.
- Integrated **CCTV image capture** into the gate pass workflow for real-time visual verification and operational security.
- Delivered a platform that went on to handle **100k–150k gate pass** transactions/month through the gate pass module alone, with all 9+ modules stable in production.

PHP Developer *Mar 2022 – Aug 2022*

Convert Generation IT — Pakistan

- Delivered **5+ custom PHP** web applications entirely solo — including a POS system, library management system, hotel booking platform, and a multi-vendor e-commerce site, each owned end-to-end from development to deployment.
- Contributed to **Exam 360** — an **India-based** examination & staff management platform — refactoring existing modules and developing new ones within an existing codebase.
- Independently built **Exam 360 E-Learn** from scratch — a companion **LMS** to Exam 360 supporting course delivery, exam workflows, and student management.
- Developed an online order booking system for **Al Haaj Bundoo Khan** — a well-known restaurant brand — delivering a responsive customer-facing ordering experience against a real client brief.
- Built **Musafir**, a real-time travel admin panel using **JavaScript** and **Firebase**, managing live booking and itinerary data with real-time sync.
- Converted an **Adobe XD design** into a fully responsive front-end using HTML, Bootstrap, and JavaScript — pixel-perfect handoff from design to code.

KEY PROJECTS

Submittly — Automated Content Submission & Evaluation System | Final Year Project

MERN app with 3-tier Role Based Access Control, automated evaluation pipeline, and real-time WebSocket chat. GitHub ↗

Stack: *MongoDB, Express.js, React.js, Node.js, WebSockets*

Energy Management System — Zap Electric FZCO

End-to-end energy services platform — admin dashboard, 85+ REST APIs, Stripe billing, and Google Maps API.

Stack: *Laravel, MySQL, REST APIs, Stripe, Google Maps API*

Housing Society Platform — Optimum Tech

Rescued and stabilized a 9+ module legacy platform — refactored codebase, led Laravel 6 to 9 migration, 100k–150k gate pass transactions/month.

Stack: *Laravel, MySQL, MVC*

CERTIFICATIONS

- **AWS Cloud Practitioner Essentials** — Amazon Web Services (May 2026)
- **React - (incl. Next.js, Redux)** — Udemy (Aug 2025)
- **Node.js (Express & MongoDB)** — Udemy (Sep 2025)
- **JavaScript — Beginner to Advanced** — Udemy (Nov 2024)

EDUCATION

BS Computer Science — Virtual University of Pakistan *(Graduated: April 2026)*

ADDITIONAL INFORMATION

Nationality: Pakistan | **Visa Status**: Own Visa (valid till Dec 2027) | **Driving License**: Yes | **Languages**: English (Professional)
